Dr. Thay Joe Tan, MD PhD DMD
explains why
TurboAcupuncture® is THE
Revolutionary NEW Gold
Standard in Pain Therapy

TurboAcupuncture[®]

by Dr. Thay Joe Tan

**Instant Pain Elimination With Surgical Precision
THE Revolutionary New Gold Standard in Pain Therapy
A Paradigm Shift in Medicine**

Skilled in routinely eliminating pain within seconds, simply by inserting a small acupuncture needle just 0.5 to 1.0 mm into the body, elevates Dr. Thay Joe Tan to the forefront as the leading authority for Instant Pain Elimination and predestines him to be the key opinion leader in Pain Therapy, leading to a paradigm shift in medicine.

Moreover, as an exceptionally gifted, passionate and enthusiastic teacher, he is able to pass on the essence of his 20+ years of knowledge and experience in Chinese medicine and acupuncture to any doctor in just one weekend. He perfectly understands how to simplify complex material into sections of information that are easy to understand, enabling his students to follow in a stimulating, enjoyable and interesting way.

His meticulous attention to detail in treatment, as well as in teaching, is the core foundation of his success with both patients and students alike.

He counts Medical and Naturopathic Doctors amongst his students, as well as advanced Acupuncturists with decades of experience. He even shared his knowledge with Chinese Doctors and Professors, who all experience their wow moment when they suddenly discover the simplicity, beauty and true power of *TurboAcupuncture*[®].

Dr. Thay Joe Tan is the Founder and Director of one of Europe's largest physician-led practices for Chinese medicine. He is also the originator of *TurboAcupuncture*[®] for Instant Pain Elimination and the T.A.N. (*TurboAcupuncture*[®] Navigation) system, which leads the acupuncturist like a GPS from the location of pain, step by step with surgical precision, to THE one *TurboAcupuncture*[®]

point which will with highest probability eliminate the pain instantly.

Before starting his private practice, Dr. Tan was Senior Resident and temporary Deputy of the Head of the First German Hospital for TCM, University Hospital at Beijing University of TCM in Kötzing, Germany. He is the first person outside China ever to be granted the Inherited Master Fellowship of Qi Lu School of TCM for Complex Diseases, one of 64 acknowledged Inherited Schools of TCM in China. He was awarded "Acupuncture Specialist of the Year 2018" which highlighted his many achievements.

For over more than two decades Dr. Tan has had the privilege of acquiring a deep knowledge and precious wisdom of Chinese philosophy and medicine from countless professors and teachers from all over the world.

He has combined and refined their best and most effective methods and condensed them into a unique system able to eliminate pain within seconds, using only one single acupuncture point.

Due to this unique system being so highly

Instant Pain Elimination Expert of the Year 2019

Global

Dr. Thay Joe Tan speaking at The Forum™ of the Global Entrepreneurship Initiative™ at United Nations Headquarters in New York

effective and fast acting, Dr. Thay Joe Tan named it '*TurboAcupuncture*'. This innovative name was inspired by the term "Turbo", on the one hand implying the very fast and very powerful effect of *TurboAcupuncture*® regarding pain elimination and on the other hand addressing the fact that the method is so quickly transferable and applicable and that it catapults every doctor's therapeutic competency into a totally new dimension in just one weekend, giving the doctor the advantage of therapeutic superiority.

TurboAcupuncture® can help for a wide range of ailments covering any kind of pain like migraine and other headaches, neck, back, joint, abdominal, genital, menstrual, eye, ear, mouth, nerve and postoperative pain including chronic and complex pain, as well as the whole bandwidth of medicine such as skin, lung, stomach, bowel, gynaecological, genital and fertility issues.

As a native German of Chinese origin, trained in dentistry and both, conventional Western and Chinese medicine, Dr. Tan understands how to integrate the intelligent power and elegance of Chinese medicine into the setting of mainstream Western medicine.

Fact #1

Pain is one of mankind's major health issues. That is why all around the globe research is being conducted to find out the origin of pain, how it develops and how it can be treated. To be able to successfully treat and finally eliminate pain instantly, you need to first of all understand pain. Basically, it's like

a game. If you want to win a game you need to understand the game, know the rules and then play it better than anyone else. Then, and only then, will you be able to win the game again and again and finally dominate pain.

In the way mainstream Western medicine understands and treats pain, worldwide hundreds of millions of people are left with and in pain. In the United States alone there are 80 million patients suffering from chronic pain which is equivalent to the entire population of Germany.

Fact #2

The question of how pain develops and how it can be treated was answered some 4,500 years ago according to classical Chinese medical literature which is nowadays made available to the general public. Therefore there is no longer any need to do research about it.

According to Dr. Thay Joe Tan, establishing *TurboAcupuncture*®, instant pain elimination with only one needle as first line treatment in pain therapy, would release 19 out of 20 patients from pain, typically within seconds.

Fact #3

Every doctor is able to acquire this unique skill of instant pain elimination in just one weekend, as Dr. Thay Joe Tan has distilled the essence of his decades of experience in acupuncture and delivers it to his students on a silver platter.

The Difference: ONE Needle ... ONE Weekend ...

Putting Fact #2 and Fact #3 together results in:

The difference between a patient with pain and the same patient without pain = ONE needle. And the difference between a doctor who can do this and a doctor who cannot = ONE weekend.

This close is mankind to pain no longer being an issue.

Due to patients and doctors being unaware of these facts, hundreds of millions of patients continue to suffer from pain (see Fact #1).

The Missing Link

TurboAcupuncture® is the missing link between Western and Chinese medicine. Its results and efficiency are indisputable, regardless of whether or not they have been proven and backed up by any prospective, randomised, double blind placebo-controlled studies. The acceptance of its undeniable superiority in pain therapy by Western medicine could lead to a wider acceptance of all other benefits offered by Chinese medicine.

Moreover, according to Dr. Thay Joe Tan the concept of *TurboAcupuncture®* provides the missing link between “normal” acupuncture and the fact that, with the minimal knowledge of only 12 points, it is possible to control almost the entire body.

Prof. Wang Xinlu honours Dr. Thay Joe Tan being the very first outside China to receive the Inherited Master Fellowship of Qi Lu School of TCM for Complex Diseases.

A Paradigm Shift in Medicine

TurboAcupuncture® unquestionably causes a disruption in mainstream Western medicine as well as in the acupuncture world itself. Although *TurboAcupuncture®* is based on classical Chinese medical literature, it is practically unknown even in China.

As a result of its undeniably preeminent superiority, according to Dr. Tan, *TurboAcupuncture®* undoubtedly deserves the right to be established as THE New Gold Standard for Instant Pain Elimination across all medical subspecialties. Its outstanding importance determines that it should ultimately also be taught in medical universities to every first-year medical student.

Why *TurboAcupuncture®* is Revolutionary

The revolutionary aspects of *TurboAcupuncture®* are:

1. Immediate effect (typically instantly or within seconds), no matter which type of pain
2. Quick and easy application (only ONE needle inserted 0.5-1.0 mm)
3. Quick and easy to learn without any prior knowledge (in ONE weekend)
4. Minimal knowledge necessary (only 12 points)

So the real incredible revolution lies in the fact that, with minimal knowledge, it is possible to control almost the entire body. Dr. Tan is often called “Magician” or “Wizard” by his patients. He himself is fascinated by the simplicity, beauty and true power of *TurboAcupuncture®* in each and every patient he treats.

How Patients Benefit

Most patients typically experience instant elimination of their pain, no matter whether acute or chronic pain, regardless of how severe or complex that pain might be.

Being released from pain means a new life, being able to move, walk or sleep properly, even working and returning to all that life has to offer!

Dr. Tan teaching at Dongzhimen Hospital, International Department, Beijing University of Chinese Medicine

How Doctors Benefit

In ONE weekend, doctors can acquire the unique skill of instant pain elimination. This immediately turboboosts their therapeutic competency into a totally new dimension and gives them the following benefits:

1. Becoming an acupuncture expert in one weekend (without spending years learning hundreds of acupuncture points)
2. Developing their full potential as doctors
3. Owning therapeutic superiority
4. Magnetically attracting new grateful patients who will come back with each future pain
5. Quickly starting, filling and growing their practice with ease in no time
6. Having the option to enjoy a fulfilling second career after retirement

Paracelsus said: "The Art of Medicine can neither be inherited nor be copied from books", and the same applies even more to the Art of Instant Pain Elimination. It needs the right teacher who has the experience and sovereignty to drastically shorten the student's learning curve and thereby saving the student precious time and money.

His students, amongst them experienced experts in the field of acupuncture, attest that *TurboAcupuncture®* is a total game changer. They report outstanding successes and to quote one: "I understood and learned more about Chinese medicine and acupuncture in one weekend than I did in the past ten years."
